this work addresses the topic of philosophical complexity which shares certain assumptions with scientific complexity cybernetics and general systems theory but which is also developing as a subject field in its own right specifically the post structural reading of philosophical complexity that was pioneered by paul cilliers is further developed in this study to this end the ideas of a number of contemporary french post structural theorists and their predecessors including derrida nancy bataille levinas foucault saussure nietzsche heidegger and hegel are introduced the implications that their various insights hold for our understanding of complex human systems are teased out at the hand of the themes of economy social ontology subjectivity epistemology and ethics the analyses are also illuminated at the hand of the problematic of the foreigner and the related challenges of showing hospitality to foreigners the study presents a sophisticated account of both philosophical complexity and philosophies of difference by relating these subject fields the study also extends our understanding of philosophical complexity and offers an original characterisation of the aforementioned philosophers as complex thinkers

corporations and the environments in which they operate are complex with changing multiple dimensions and an inherent capacity to evolve qualitatively a central premise of this study is that a postmodern reading of ethics represents an expression of and an engagement with the ethical complexities that define the business landscape in particular

the deconstructive philosophy of jacques derrida offers a non trivial reading of a complex notion of ethics and thereby helps us to develop the skills necessary to critique and intervene in our practices and to develop robust strategies for living in the absence of prescriptive ethical frameworks although a central premise of this study is that substantive ethical claims can only be generated within a given context the study nevertheless presents readers with a meta position that illustrates the type of considerations that should inform ethical reflection from a complexity perspective in order to illustrate the value that this meta position holds for business ethics these considerations are explored in terms of the implications that they hold for our understanding of corporate social responsibility for the practice of responsible management and leadership practices and for teaching business ethics

annual re issue of the royal engineer institute s occasional papers issued quarterly

this guide to the emerging language of creative industries field is a valuable resource for researchers and students alike concise extensively referenced and accessible this this is an exceptionally useful reference work gauti sigthorsson greenwich university there could be no better guides to the conceptual map of the creative industries than john hartley and his colleagues pioneers in the field this book is a clear comprehensive and accessible tool kit of ideas concepts questions and discussions which will be invaluable to students and practitioners alike key concepts in creative industries is set to become the corner stone of an expanding and exciting field of study chris barker university of wollongong creativity is an attribute of individual people but also a feature of organizations like firms cultural institutions and social networks in the knowledge economy of today creativity is of increasing value for developing emergent and advanced countries and for competing cities this book is the first to present an organized study of the key concepts that underlie and motivate the field of creative industries written by a world leading team of experts it

presents readers with compact accounts of the history of terms the debates and tensions associated with their usage and examples of how they apply to the creative industries around the world crisp and relevant this is an invaluable text for students of the creative industries across a range of disciplines especially media communication economics sociology creative and performing arts and regional studies
